# Introduction

This report presents Federal Government expenditures by State and U.S. Outlying Area. Coverage includes Federal Government expenditures for grants to State and local governments, salaries and wages, procurement, direct payments for individuals, and other programs for which data are available by State and outlying area. For fiscal year 1996 (October 1, 1995 to September 30, 1996), the statistics compiled cover \$1.4 trillion. The data are shown by program or Federal agency whenever possible.

Federal Government expenditure amounts not included in this report reflect data that could not be distributed by State and outlying area, or that were not available. Examples are:

- Net interest on the Federal Government debt.
- International payments and foreign aid.
- Current operational expenses not included under salaries or procurement (tables 3 and 5).
- Expenditures for selected agencies (such as the Central Intelligence Agency and National Security Agency).
- Foreign outlays within each of the categories in tables 2 through 6.

Data are also available on the Bureau of the Census Internet site at <http://www.census.gov/prod/2/gov/fes96.pdf>.

## CONSOLIDATED FEDERAL FUNDS REPORT SERIES

This report is one of two publications comprising the Consolidated Federal Funds Report (CFFR) series. The second is the Consolidated Federal Funds Report, Fiscal Year 1996, County Areas. This report presents information similar to the data in the CFFR county areas publication, except that in this report grants to State and local governments represent actual expenditures of the Federal Government, and are shown separately from other grants. In the CFFR county areas publication, Federal grants generally represent obligations, and payments to State and local governments are not distinguished from grants to nongovernmental recipients.

Another difference between this report and the CFFR county areas publication is in the coverage of housing assistance programs. In this report, public housing grants and Section 8 housing assistance payments to public landlords are included in table 2 as grants. Section 8

payments (including vouchers) to private landlords are classified as direct payments for individuals and are shown in table 4. In the CFFR county areas publication, all Section 8 housing assistance is classified as "payments for individuals." However, due to the difficulty in identifying and assigning certain housing grants, there is some blurring of the individual program amounts comprising total housing assistance payments. Also, this report presents Federal Emergency Management Agency disaster relief payments to government agencies in table 2 as grants, and individual assistance payments under the Disaster Assistance Program as direct payments for individuals in table 4. In the CFFR county areas publication, all disaster assistance payments under this program are presented as grants.

The CFFR county areas publication covers Federal expenditures for all object categories (grants, salaries and wages, direct payments for individuals, procurement, and other direct payments) shown in this publication. Users should consult the introductory text in the CFFR county areas publication for detailed explanations of the data reported there.

## SOURCES AND LIMITATIONS OF DATA

Federal Government departments and agencies provide all data in this report, as outlined in the Technical Notes below. Data are reviewed for accuracy and consistency, and compared to actual outlays in the Federal Budget to assure reasonableness and proper coverage. No attempts have been made to account for all Federal Government expenditures as reported in the Federal Budget, or as presented in the Census Bureau annual reports on government finances.

Users are urged to carefully read the Technical Notes, particularly as to the conceptual coverage represented by each table in this report.

## TECHNICAL NOTES

Statistics for this report come from a variety of sources within the Federal Government. Consequently, amounts in each table may represent different accounting or timing concepts. Below is a table-by-table description of the sources and coverage of the statistics.

Whenever possible, this report uses statistics representing actual expenditures of the Federal Government during the fiscal year. The primary exception, as noted below, is

for Federal Government procurement statistics provided by the Federal Procurement Data Center. The procurement data represent the value of obligations for contracts awarded during fiscal year 1996.

**Table 1**

All amounts in table 1 are aggregates from data included in succeeding tables. Data are rounded to millions of dollars.

**Table 2**

All amounts of Federal Government grants and other payments to State and local governments represent actual cash outlays made during the fiscal year. Each Federal Government executive department and agency maintains annual data on grants and other payments to governmental units pursuant to Office of Management and Budget (OMB) Circular A-11. The data are collected from Federal agencies by the Census Bureau.

Prior to 1983, such data were incorporated into the report *Federal Aid to States*, published by the Department of the Treasury. The Treasury Department collected and published Federal grants data in accordance with the former Treasury Circular 1014 and the annual Treasury Financial Manual. Both of these contained definitions and reporting guidelines consistent with OMB Circular A-11 and the current Census Bureau reporting guidelines. Hence this publication (*Federal Expenditures by State*) and the previous Treasury Department publication *Federal Aid to States* provide users with historically consistent statistics on Federal agency payments to State and local governments.

Federal Government aid to State and local governments includes the following:

1. Direct cash grants to State or local government units.
2. Payments for grants-in-kind, such as purchases of commodities distributed to State or local government institutions (e.g., school programs).
3. Payments to nongovernment entities when such payments result in cash or in-kind services passed on to State or local governments.
4. Payments to regional commissions and organizations that are redistributed to the State or local level.
5. Federal Government payments to State and local governments for research and development that is an integral part of the provision of public services.
6. Federal revenues shared with State and local governments.

It should be noted that the outlays covered in table 2 exclude Federal Government payments to individuals, profit or nonprofit institutions not covered above, and payments for services rendered. Grants to individuals and profit or nonprofit institutions are covered in table 6 of this report. Payments for services rendered by non-Federal employees and agencies are largely covered in table 5 of this report.

The examination and edit process the Census Bureau uses include a comparison of reported data to information submitted for the prior year, and to budget amounts supplied by the Office of Management and Budget. All grants data are reconciled by budget account and to budget figures that each Federal agency is required to submit annually to OMB, in accordance with OMB Circular A-11. Discrepancies are brought to the attention of the reporting agencies and, where warranted, revisions are made. The Office of Management and Budget also provides assistance in the classification of grants and in ensuring compliance with the reporting requirements.

**Table 3**

Amounts reported for Federal Government salaries and wages are provided by the Department of Defense, Department of Transportation (United States Coast Guard), Office of Personnel Management (OPM), and United States Postal Service. All amounts represent outlays during the Federal Government's fiscal year 1996.

Department of Defense (DOD) military payroll statistics are provided by the Directorate for Information Operations and Reports, Washington Headquarters Services, Department of Defense. Amounts represent estimates by State, and include gross compensation, except retired military pay which is reported in table 4. Other features of the Department of Defense salaries and wages data include the following:

1. Amounts for military personnel stationed overseas are excluded from totals.
2. Salaries and wages for inactive personnel refer to military Reserve and National Guard payroll.
3. Amounts reported reflect the place of employment (duty station) rather than home residence.

Payroll statistics provided by the United States Postal Service represent actual outlays during fiscal year 1996, but with the national total distributed among the States on an estimated basis. State-by-State estimates derive from calculating the "per employee" payroll cost, applying this cost to each postal facility on the basis of the number of employees, then aggregating to the State level for reporting purposes. Estimates are based on place of employment rather than place of residence.

The U.S. Coast Guard provided salaries and wages for their uniformed employees. Geographic allocation is based upon place of employment.

The Office of Personnel Management provided statistics on salaries and wages (including premium pay and lump sum payments) for all other civilian Federal Government personnel working in the States and U.S. Outlying Areas. The OPM statistics reflect actual outlays during the fiscal year for civilian salaries, but with the national aggregate distributed among the States on an estimated basis. Assumptions concerning the salaries and wages data compilation from OPM are:

1. The basis for the geographic distribution is place of employment. Data on salary and employment distribution from the OPM Central Personnel Data File (CPDF) as of March 31, 1996, are the basis for geographically prorating total fiscal year 1996 payroll and payment data from the "Monthly Report of Federal Civilian Employment" (SF 113-A).
2. Estimated payroll data are produced at the State, county, and outlying area levels only.
3. State, county, and outlying area payroll data for each agency are partially estimated. The assumption is that premium pay and lump sum payments as well as part-time and intermittent pay are proportional to the salaries of full-time Federal civilian employees (defense and non-defense) in the States, counties and outlying areas.
4. Judicial pay is estimated using the above assumption with the exception of the Supreme Court whose SF 113-A pay is added to the District of Columbia's non-defense payroll.

The methodology used to estimate the geographic distribution of salaries and wages data involves the following steps:

1. Actual expenditures data for salaries and wages are obtained from the SF 113-A. Salary and wage data on the SF 113-A are total expenditures (including basic, premium, and lump sum payments) for all Federal civilian employees. These data are not reported by State and county on the SF 113-A.
2. From OPM's CPDF and agency survey data, aggregate basic salaries for full-time employees only are computed for each county, each outlying area, total U.S., and total outlying areas. Based on these aggregate basic salaries, DOD and non-DOD percentages are computed. These percentages determine each county's and outlying area's proportion of the total (U.S. and outlying areas) full-time salaries.
3. The percentages referenced above are applied to SF 113-A agency payroll data for the U.S. and outlying areas to estimate actual expenditures in counties and

outlying areas. State and outlying area totals are obtained by aggregating estimated actual expenditures in counties and outlying areas, respectively.

4. Federal pay expenditures in Washington, D.C. are computed by the above methodology. However, a supplement is then added to this estimate for agencies not reporting to the Central Personnel Data File. The supplement consists of agency payroll data for the following agencies: U.S. Congress, Congressional Budget Office, White House Office, Office of the Vice President, Federal Reserve Board, Architect of the Capitol, U.S. Botanic Gardens, Library of Congress, Copyright Royalty Tribunal, U.S. Tax Court, Office of Technology Assessment, and the Supreme Court. Since employment in these agencies is primarily, and in most cases totally, in the District, payroll data are added to the District's estimate.

**Table 4**

Except where indicated, data in table 4, Direct Payments for Individuals, are compiled from amounts reported by the Federal Agencies for the Federal Assistance Award Data System (FAADS).<sup>1</sup> Amounts reported represent obligations of Federal funds.

Data on Social Security and Supplemental Security Income (SSI) payments come from reports submitted by the Social Security Administration. Medicare data are reported by the Department of Health and Human Services for the FAADS. All amounts reflect obligations during the fiscal year, with the State-by-State distribution estimated. All amounts are reported by recipient location. Excluded from the amounts reported are payments to recipients in foreign countries. The amounts shown under the SSI program exclude any State government shares administered by the Federal Government.

Retirement and disability payments for Federal civilian and military personnel represent actual expenditures during the fiscal year. Data on military retirement are obtained along with Department of Defense salaries data from DOD (see Technical Notes above for table 3).

Data on retired civilian employee payments are from the OPM, Compensation Group. Figures include expenditures for all periodic annuity, survivor annuity, lump sum death claims, and withdrawals. Annual expenditures reflect actual payments, with the State-by-State distribution based on the ZIP code of the recipient's place of residence. Included in the amounts shown for civilian retirement benefits is \$520

<sup>1</sup>The Federal Assistance Award Data System is a quarterly report of financial assistance awards made by each Federal agency. Coverage includes grants, direct payments to individuals and others, insurance, and loans. Data submitted by Federal agencies for this system serve as the source, as indicated, for many of the statistics in this publication. The Office of Management and Budget selected the Census Bureau as executive agent, responsible for operating the FAADS.

million in benefits for retired uniformed Coast Guard personnel, for which data were obtained from the Department of Transportation. Also included in the total is \$116 million in benefit payments for retired Public Health Service Commissioned Corps employees, obtained from that agency, as well as benefits and lump sum withdrawals for three other Federal employee programs: Foreign Service Officers (\$354 million); the National Oceanic and Atmospheric Administration (NOAA) Corps (\$9 million); and Tennessee Valley Authority (TVA) (\$212 million). Data are obtained from the State Department, NOAA, and TVA, respectively.

Amounts reported for the various veterans programs in table 4 are from data supplied by the Department of Veterans Affairs (VA) for the FAADS. Information from each quarterly FAADS report covering fiscal year 1996 are tallied to arrive at the fiscal year totals. Amounts reported by the VA for veterans benefit programs represent actual outlays during the fiscal year. Foreign payments are excluded from the data.

Food Stamp program data are supplied by the Department of Agriculture for the FAADS. Amounts reflect the actual value of coupons issued, by State, during the fiscal year. Figures may differ slightly from amounts representing the value of coupons redeemed or processed through the Federal Reserve System.

Social insurance payments for railroad workers reflect benefits paid under the Railroad Retirement Act and Railroad Unemployment Insurance Act. Amounts represent actual outlays during the fiscal year, reported by residence of recipient. Data are reported by the Railroad Retirement Board, for the FAADS.

In the CFFR county areas volume (and data file available on Internet and CD-ROM) all Department of Housing and Urban Development housing assistance is classified in the direct payments to individuals category. The total (\$19 billion) is allocated by state and county. In this publication, housing assistance outlays are split where possible between table 2 (grants—for payments to public agency landlords), and table 4 (direct payments to individuals).

Data on the Pell Grant program represent actual outlays during the fiscal year. The State-by-State distribution is based on the location of the recipient school to which the payment is made.

The Federal Family Education Loan program amounts represent interest subsidies paid to lending institutions during the fiscal year. Total Federal expenditures reflect actual payments. Information on this program is supplied by the Department of Education in a special submission for the FAADS.

Earned income tax credits represent the total refundable portion of earned income credit reported by taxpayers within each State in calendar year 1996 for tax year 1995. Information was obtained from the Department of the Treasury, Internal Revenue Service, Statistics of Income Division. Amounts reflect only the excess earned income tax credit amounts actually refunded.

Federal Employee Workers Compensation payments are from reports submitted by the Department of Labor, Employment Standards Administration, Office of Workers' Compensation Programs, for the FAADS. Amounts for fiscal year 1996 reflect actual payments, with the State-by-State distribution based on the ZIP code of the recipient's place of residence.

Federal Government expenditures for Black Lung benefits are reflected in two programs. Coal Mine Workers' Compensation payments refer to the program administered by the Labor Department, Employment Standards Administration. The program is number 17.307 in the Catalog of Federal Domestic Assistance (CFDA). Amounts reported for this program represent actual outlays during fiscal year 1996. Amounts for Special Benefits for Disabled Coal Miners reflect CFDA program 96.005, of the Department of Health and Human Services (HHS). Amounts reflect obligations for the fiscal year, distributed on the basis of residence of the recipient.

Statistics on Federal expenditures for unemployment compensation are compiled from information obtained from the Department of Labor. Amounts reported include all benefit payments made from the Unemployment Compensation Trust Fund, regardless of the source of funding for the payments. Thus, amounts reported include regular and extended benefits to unemployed workers, and benefits to ex-Federal and ex-military employees. Prior to 1989, only benefit payments financed by the Federal government were included in this publication.

Of the amount shown in the "other" direct payments column, two data items are from sources other than the FAADS. These are payments under the Pension Plan Termination Insurance program of the Pension Benefit Guaranty Corporation and the Safety Officers Benefit program of the Department of Justice.

## Table 5

Statistics in table 5, covering Federal Government procurement contracts, are obtained from the United States Postal Service (USPS) and the Federal Procurement Data Center (FPDC).

Amounts provided by the USPS represent actual outlays for contractual commitments, while amounts from the FPDC represent the value of obligations for contract actions, and do not reflect actual Federal Government expenditures. In general, only current year contract actions are reported for data provided by the FPDC; however, multiple-year obligations may be reflected for contract actions of less than 3 years duration.

The FPDC collects procurement data from most Federal Government departments and agencies, and provides these data according to the place of performance rather than the location of the prime contractor. Excluded from the procurement totals reported are amounts for the judicial and

legislative branches of government and most intergovernmental transfers of funds. Also excluded from the totals are amounts for procurement in foreign countries. As indicated in the footnotes to table 5, foreign procurement awards were \$7.5 billion in fiscal year 1996, with \$6.4 billion for the Defense Department and \$1.1 billion for all other Federal Government agencies other than the USPS.

Most contract actions provided by the FPDC with values under \$25,000 are not distributed by State and outlying area. These amounts, as indicated in the footnotes to table 5, are reported as "undistributed."

Procurement data provided by the USPS include all outlays made under formal contractual agreements. The FPDC data include contractual actions for construction, purchase of equipment, and other purchases of tangible items by the Federal Government. Also included with the FPDC data are contractual actions for services often not generally associated with procurement, such as the purchase of utilities, building leases, and other services entered into via contractual agreement.

#### **Table 6**

Grant amounts shown in table 6 come from the Federal Assistance Award Data System (FADDS). These grant programs represent awards to nongovernmental recipients during the fiscal year. The amounts do not duplicate data on grant expenditures reported in table 2. Appendix A contains a list of the specific grant programs included in table 6.

Table 6 grant amounts generally represent obligations of the Federal Government, based upon awards of financial assistance during the fiscal year. Estimates of the differences between these amounts and actual expenditures are not available, but are believed to be small.

Amounts shown for "direct payments-other than for individuals" also come from the FAADS, with exceptions for those programs listed below. These amounts generally represent obligations incurred during the fiscal year.

The Agriculture Department is the source for data on claims and adjustor expenses under the Federal Crop Insurance program. Data reflect actual expenditures during fiscal year 1996.

Amounts shown for the Federal employee life and health insurance programs are from the Office of Personnel Management. For both the life insurance and health insurance programs, the amounts reported represent only the employer (Federal Government) share of the premiums. The life insurance portion of premiums (\$390 million) is allocated by State according to the percentage of the total of all death and dismemberment claims paid to each State or outlying area. The employer share for health insurance premiums (\$10.3 billion) is allocated based upon calendar year 1996 claims filed at the local carriers headquarters offices in each State area.

The Federal Emergency Management Agency provided data on claims paid under the National Flood Insurance program. Postal Service and Legal Services Corporation expenditures data are from these two agencies. The Legal Services Corporation payments represent annualized grants and contracts, by State, made by this agency from the subsidy it receives from the Federal Government.

#### **Table 7**

Loan and insurance program amounts in table 7 do not represent actual expenditures of the Federal Government, but instead reflect the volume of loan or insurance activities. These amounts represent either direct loans made to certain categories of borrowers, or the Federal Government contingent liability for loans guaranteed and direct insurance against loss. All amounts reflect the dollar value of loans or insurance coverage provided during the fiscal year, and not the cumulative totals of such activity over the life of the programs.

Most data are from reports submitted to the Bureau of the Census for the Federal Assistance Award Data System by the departments and agencies which administer the programs shown.

#### **Table 8**

Per capita Federal expenditure amounts in table 8 are computed using 1996 population estimates for the 50 States and the District of Columbia, and 1990 populations for the outlying areas. All computations are based on dollar amounts in thousands.

#### **Table 9**

Percentage distributions of Federal expenditures are computed based on dollar amounts in thousands.

#### **Table 10**

The Defense Department and other agency expenditure amounts in table 10 are computed from data in tables 2 through 6. Figures for Department of Defense grants to State and local governments (table 2), salaries and wages (table 3), retired military pay (table 4), procurement (table 5), and research grants (table 6) are tallied to arrive at a total for Department of Defense expenditures.

This total is then netted from the grand total of Federal Government expenditure, and the residual categorized as nondefense expenditures. This procedure is followed for each State and outlying area.

Per capita and percent distribution amounts are computed using the derived defense/nondefense totals, as described above for tables 8 and 9.

Data in the column on Energy Department defense related activities are from the Department of Energy, Office of the Assistant Secretary for Defense programs. These data represent atomic energy defense activities, and are presented on an exhibit basis only. Dollar amounts represented are included under other categories (such as procurement or salaries and wages) in tables 2-6.

Table 11

*Federal Expenditures by State* has been published annually since fiscal year 1981. The data in table 11 represent summary totals, by State and object category, of covered Federal expenditures from fiscal years 1987 to 1996. Amounts shown include revisions to originally published figures, where applicable. These revisions are made where errors existed in the original data, or where Federal programs have been reclassified to another object category of expenditure.

Users should be aware of the following factors that affect the historical consistency of the data:

- Data on expenditures for unemployment compensation benefits have been modified, effective with fiscal year 1989. Data now include all outlays from the Unemployment Compensation Trust Fund, including benefits financed by State and Federally imposed taxes. Prior to 1989,

data covered only Federally financed benefits, and net Federal advances to the State accounts. This change in the treatment of unemployment benefits is consistent with the accounting procedures applied in the Federal Budget.

- Significant revisions were made to procurement data for fiscal year 1989.

Table 12

Per capita rankings in table 12 are derived from expenditures for object categories reported in tables 1 through 6. The District of Columbia and the outlying areas are excluded from the computations.

MEANING OF SYMBOLS

The symbols in the tables have the following meanings:

- Represents zero or rounds to zero.
- (NA) Not available.
- r Revised from amount published in prior year.
- x Not applicable.
- () Numbers in parenthesis represent negative amounts.

Note: Department of Defense data represent salaries, wages, and compensation, such as housing allowances; distributions by State are based on duty station. State detail for all other Federal Government agencies are estimates, based on place of employment. See text for additional information.

<sup>1</sup>Excludes Social Security Administration salaries, which are now included with "other nondefense" salaries figures.

<sup>2</sup>Figures include FBI salaries, reported separately in previous years.

<sup>3</sup>Figure for Undistributed represents Federal Judiciary salaries that could not be geographically allocated.

Note: Data shown for U.S. Postal Service represent actual outlays for contractual commitments, while all other amounts shown represent the value of contract actions, and do not reflect Federal Government expenditures. Nonpostal data generally involve only current year contract actions; however, multiple-year obligations may be reflected for contract actions of less than 3 years duration. Foreign procurement contract awards are excluded from United States totals. Foreign award total equals \$7,449,710,000, including \$6,367,932,000 for the Department of Defense and \$1,131,778,000 for all other Federal agencies. Amounts in parenthesis represent the deobligation of prior year contracts.

<sup>1</sup>Includes \$351,655,000 for Agency for International Development; \$5,558,000 for National Archives and Records Administration; \$3,959,000 Arms Control and Disarmament Agency; \$13,649,000 Commodity Futures Trading Commission; \$628,000 Consumer Product Safety Commission; \$32,777,000 Equal Employment Opportunity Commission; \$1,219,000 Federal Communication Commission; \$1,902,000 Federal Election Commission; \$4,592,000 Federal Trade Commission; \$307,000 International Trade Commission; \$886,000 Interstate Commerce Commission; \$5,125,000 John F. Kennedy Center for the Performing Arts; \$5,148,000 National Labor Relations Board; \$2,535,000 National Foundation on the Arts and Humanities; \$42,198,000 National Science Foundation; \$317,000 Merit System Protection Board; \$7,856,000 National Gallery of Art; \$1,274,000 National Mediation Board; \$84,225,000 Nuclear Regulatory Commission; \$2,138,000 Peace Corp; \$60,905,000 Office of Personnel Management; \$6,313,000 Railroad Retirement Board; \$30,709,000 Securities and Exchange Commission; \$147,000 Selective Service System; \$92,206,000 Smithsonian Institution; \$458,434,000 Social Security Administration; \$18,085,000 The White House; \$2,524,108,000 Tennessee Valley Authority; \$4,308,000 Trade and Development Program; \$11,734,000 United States Armed Forces Retirement Home; and \$91,117,000 United States Information Agency.

<sup>2</sup>Includes awards under \$25,000 and classified location awards (Department of Defense).
