

NATIONAL INCOME AND PRODUCT ACCOUNTS

National Income and Product Accounts Tables

This section presents revised estimates for 1990 through the second quarter of 1993 for most of the national income and product accounts (NIPA) tables that are usually published as part of an annual revision of the NIPA's. (The article that precedes this section describes the annual NIPA revision.)

Fifteen tables that are usually included in the full set of NIPA tables are not yet available on the revised basis; they are scheduled to be published in the September 1993 SURVEY OF CURRENT BUSINESS. The missing tables are 1.15, 1.16, 3.15–3.20, 7.15, and 9.1–9.6. A list of the full set of tables is shown below.

The revised NIPA estimates, along with the estimates for 1989 and earlier years (back to 1929), are available on diskette and magnetic tape. For order information, write to the National Income and Wealth Division (BE-54), Bureau of Economic Analysis, Washington, DC 20230, or call (202) 606-9700.

The tables contain annual, quarterly, and monthly estimates, indicated as follows:

A	Only annual estimates
Q	Only quarterly estimates
QA	Quarterly and annual estimates
MA	Monthly and annual estimates

A detailed index to the NIPA tables begins on [page 122](#).

1. Equals personal income less the following farm components: wages and salaries, other labor income, proprietors' income with inventory valuation and capital consumption adjustments, and net interest. These farm components plus employer contributions for social insurance and farm corporate profits with inventory valuation and capital consumption adjustments equal farm national income shown annually in table 1.21.

1. Beginning in 1967, the treatment of net exports of gold in the NIPA's differs from that in the BPA's. BPA gold exports (line 2) and imports (line 13) are excluded from the NIPA's. Imports of gold in the NIPA's (line 16) is the excess of the value of gold in final sales of domestic product plus the change in business inventories over the value of U.S. production of gold. Prior to 1967, the treatment of net exports of gold in the NIPA's and BPA's is identical and is the same as the present NIPA treatment.

2. BPA capital gains and losses included in U.S. direct investment income abroad (line 3) and in foreign direct investment income in the United States (line 14) are removed from the NIPA's beginning in 1974 for imports and in 1977 for exports. Beginning in 1982, U.S. direct investment income abroad in the BPA's excludes capital gains and losses associated with currency translation adjustments.

3. Transfers of goods and services under military grant programs, net, are classified as exports in the BPA's. In the NIPA's, these transactions are excluded from exports and included in Federal Government purchases.

4. Consists of statistical revisions in the BPA's that have not yet been incorporated in the NIPA's.

5. Consists of arms shipments to Israel financed under the Emergency Security Act of 1973. In the NIPA's, these arms shipments are classified as military grants, which are included in the defense purchases component of GDP at the time they are acquired by the U.S. Government. Their transfer abroad is not reflected in the NIPA's.

6. Consists of transactions between the United States and its territories, Puerto Rico, and the Northern Mariana Islands. The treatment of U.S. territories, Puerto Rico, and the Northern Mariana

Islands in the NIPA's differs from that in the BPA's. In the NIPA's they are included in the rest of the world; in the BPA's, they are treated as part of the United States. The adjustments to exports and imports of goods and services and to receipts and payments of factor income are shown in lines 7 and 17, respectively. The adjustment to unilateral transfers, net (line 35) consists only of transfer payments from persons because transfer payments, subsidies, and grants-in-aid from the Federal Government to residents of U.S. territories, Puerto Rico, and the Northern Mariana Islands are excluded from NIPA transfer payments to rest of the world.

7. In the BPA's, income transactions between parents and affiliates are recorded on a net basis. In BPA exports, U.S. parents' receipts from foreign affiliates for interest are net of such payments by U.S. parents to foreign affiliates. In BPA imports, U.S. affiliates' payments to foreign parents for interest, are net of such receipts by U.S. affiliates from foreign parents. In the NIPA's, these transactions are recorded on a gross basis beginning with 1974. The amount of adjustment is identical in payments and receipts of factor income and, thus, does not affect NIPA net receipts of factor income or net foreign investment.

8. Consists of shipments to the United States from Alaska and Hawaii. These are added to imports in 1946 to adjust to geographic coverage of imports to the 48-State coverage used in the NIPA's prior to 1960. From 1947 through 1959, such shipments are negligible. Beginning with 1960, the adjustment is not required because Alaska and Hawaii gained statehood in 1959.

9. Consists of financing provided to Israel in accordance with the Emergency Security Act of 1973; a U.S. Government payment to India under the Agricultural Trade Development and Assistance Act; less writeoffs of loan principal owed to the U.S. Government, which are a type of financial transaction that is excluded from the NIPA's.

NOTE.—The quantity and price indexes in this table are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. The fixed-weighted measures use as weights the composition of output in 1987. For the alternative indexes, the chain-type indexes with annual weights use weights for

the preceding and current years, and the indexes with benchmark-years weights use weights of 1959, 1963, 1967, 1972, 1977, 1982, and 1987 and the most recent year. Percent changes from preceding period for selected items in this table are shown in table 8.1.

NOTE.—Except for disposable personal income, the quantity and price indexes in this table are calculated from weighted averages of the detailed output and prices used to prepare each aggregate and component. The fixed-weighted measures use as weights the composition of output in 1987. For the alternative indexes, the chain-type indexes with annual weights use weights for the preceding and current years, and the indexes with benchmark-years weights use weights of 1959, 1963, 1967, 1972, 1977, 1982, and 1987 and the most recent year.

1. Except for farm proprietorships and partnerships (line 14) and other private business (line 18), the capital consumption adjustment is calculated in two parts. The adjustment for consistent accounting at historical cost converts depreciation based on the service lives and depreciation schedules employed by firms when filing their income tax returns to consistent service lives and straight-line depreciation schedules. The adjustment for current replacement cost converts the historical cost series with consistent accounting to a current replacement cost series. For farm proprietorships and partnerships and other private business, the historical cost series is based on consistent service lives and straight-line depreciation schedules so that the adjustment reflects only a conversion to current replacement cost.

2. Fixed capital assets owned and used by these entities are considered to be business activities selling their current services to their owners. The value of these services is included in personal consumption expenditures and is equal to their current-account purchases including consumption of fixed capital.

1. Excludes interest paid or received by government enterprises, whose interest is included in the government sector.

2. Consists of interest paid on the deposit liabilities of commercial and mutual savings banks, savings and loan associations, and credit unions.

3. Interest received by nonfinancial sole proprietorships and partnerships is considered interest received by persons and is included in line 29.

NOTE.—In table 8.17, imputed interest paid (line 36) is the difference between the property income received by financial intermediaries from the investment of depositors' or beneficiaries' funds and the interest paid by them to business, persons, governments, and rest of the world. In table 8.18, imputed interest (line 55)—the interest component of imputations that affect GNP—consists of the imputed interest paid by financial intermediaries other than life insurance carriers and private noninsured pension plans to persons and government, and the interest paid on owner-occupied housing and on buildings and equipment owned and used by nonprofit institutions serving individuals.

1. Consists of the imputations included in personal income shown in Table 8.18 except for employer-paid health and life insurance premiums (line 115). In table 8.24, these premiums are included in line 4.

2. Equals imputed interest received by persons from life insurance carriers and private noninsured pension plans as shown in table 8.17 (line 51).

3. Beginning in 1990, the methodology for estimating the difference between the IRS and NIPA depreciation estimates was changed. This change results in discontinuities between the estimates for 1990 and earlier years. The revised estimates prior to 1990 are available on request.

4. Consists of income earned by low-income individuals who are not required to file income tax returns, unreported income that is included in the NIPA measure, and gross errors and omissions in lines 2 through 15. Also includes the net effect of errors in the IRS adjusted gross income (line 17) and NIPA personal income (line 1) measures. Such errors can arise from the sample used by IRS to estimate line 17 and from the data sources used by BEA to estimate line 1.

Index to the NIPA Tables

THE ENTRIES in this index refer to national income and product accounts (NIPA) table numbers. The 53 quarterly tables that appear each month in the SURVEY are identified by bold italic type in the index; other tables are printed in regular type.

The first character of the NIPA table number (the number preceding the decimal point) identifies the table as belonging to one of the following subject areas:

- 1. Product and Income
- 2. Personal Income and Outlays
- 3. Government Receipts and Expenditures
- 4. Foreign Transactions
- 5. Saving and Investment
- 6. Income, Employment, and Product by Industry
- 7. Quantity and Price Indexes
- 8. Supplementary Tables
- 9. Seasonally Unadjusted Estimates

For most of the NIPA tables showing the industry distributions of gross domestic product, national income, and their components, a suffix is used to represent the year of the Standard Industrial Classification (SIC) underlying the estimates. Estimates for 1929–48, based on the 1942 SIC, are shown in tables designated with an “A” suffix; estimates for 1948–87, based on the 1972 SIC, are shown in tables with a “B” suffix; and estimates for 1987 forward, based on the 1987 SIC, are shown in tables with a “C” suffix.

For several tables in the “Government Receipts and Expenditures” section, a suffix is used to indicate that more detail is available for recent time periods than for earlier periods. Specifically, tables 3.7, 3.8, and 3.9 show more detail beginning with estimates for 1972, and table 3.18 shows more detail beginning with estimates for 1968. In each case, the corresponding tables for the earlier period are designated with an “A” suffix, and the tables for the later period are designated with a “B” suffix.
