## OCCUPATIONAL EMPLOYMENT AND WAGES — MAY 2024

Production occupations had employment of 8.7 million in May 2024, representing 5.7 percent of total national employment, the U.S. Bureau of Labor Statistics reported today. The largest production occupations were miscellaneous assemblers and fabricators (1.5 million) and first-line supervisors of production and operating workers (685,140). (See chart 1.) The annual mean wage across all production occupations was \$50,090, less than the U.S. average wage of \$67,920. (See chart 2.)

The Occupational Employment and Wage Statistics (OEWS) program provides employment and wage estimates for about 830 occupations in the nation, states, and approximately 530 areas. National data are available by industry for approximately 410 industry classifications and by ownership across all industries and for the educational services and hospitals industries. This news release features production, architecture and engineering, and building and grounds cleaning and maintenance occupations, in addition to largest occupations and public sector occupations. National employment and wage information for all occupations is shown in table 1.

### Production occupations

- The **largest** production occupations were miscellaneous assemblers and fabricators (1.5 million); first-line supervisors of production and operating workers (685,140); inspectors, testers, sorters, samplers, and weighers (591,180); and welders, cutters, solderers, and brazers (424,040). (See table 1 and chart 1.)
- The **highest paying** production occupations were nuclear power reactor operators (\$122,830), power distributors and dispatchers (\$109,620), and power plant operators (\$95,990). (See table 1 and chart 2.)

### Changes to the Occupational Employment and Wage Statistics (OEWS) Data

Effective with this news release, the OEWS program has implemented new metropolitan area definitions based on the 2020 decennial census and delineated by the Office of Management and Budget (OMB). This news release does not include data for Colorado and its areas because of quality concerns with Colorado's Quarterly Census of Employment and Wages (QCEW) data. See the box notes at the end of this news release for more information.

**Chart 1. Employment for the largest production occupations, May 2024**

Source: U.S. Bureau of Labor Statistics, Occupational Employment and Wage Statistics.

- The **lowest paying** production occupations were mostly related to textiles and apparel and included pressers, textile, garment, and related materials (\$33,370); laundry and dry-cleaning workers (\$33,990); and hand sewers (\$34,810). (See table 1 and chart 2.)
- The **states** with the highest concentrations of production occupations were Indiana (11.3 percent of state employment) and Wisconsin (10.5 percent).
- Metropolitan areas** with the highest concentrations of production occupations were Elkhart-Goshen, IN (32.8 percent of area employment); Sheboygan, WI (22.3 percent); and Dalton, GA (21.8 percent).
- Pay for production occupations in manufacturing industries varied widely. Industries with the **highest wages** were petroleum and coal products manufacturing (\$86,760); pulp, paper, and paperboard mills (\$66,230); and aerospace product and parts manufacturing (\$66,010).
- Manufacturing industries with the **lowest wages** for production occupations included seafood product preparation and packaging (\$38,140) and several apparel, textile, and leather products industries.

State data are available at [www.bls.gov/oes/current/oessrcst.htm](http://www.bls.gov/oes/current/oessrcst.htm); metropolitan area data are available at [www.bls.gov/oes/current/oessrcma.htm](http://www.bls.gov/oes/current/oessrcma.htm).

National industry-specific data are available at [www.bls.gov/oes/current/oessrci.htm](http://www.bls.gov/oes/current/oessrci.htm).

## Architecture and engineering occupations

- Architecture and engineering occupations had **employment** of 2.6 million and an **annual mean wage** of \$103,980. (See table 1.)
- The **largest** architecture and engineering occupations were civil engineers (355,410), industrial engineers (350,230), and mechanical engineers (286,760). (See table 1.)
- The **highest paying** architecture and engineering occupations were computer hardware engineers (\$156,770), petroleum engineers (\$153,560), and aerospace engineers (\$141,180). (See table 1.)
- The **lowest paying** occupations in this group included surveying and mapping technicians (\$56,890); environmental engineering technologists and technicians (\$63,070); and drafters, all other (\$66,530). These were the only architecture and engineering occupations with annual mean wages below the U.S. average of \$67,920. (See table 1.)
- Architecture and engineering occupations made up 44.0 percent of employment in the architectural, engineering, and related services industry, compared with 1.7 percent of overall employment. **Industries** with the highest concentrations of architecture and engineering occupations also included semiconductor and other electronic component manufacturing (22.1 percent) and aerospace product and parts manufacturing (19.3 percent).

- **Metropolitan areas** with the highest concentrations of architecture and engineering occupations were Lexington Park, MD (8.1 percent of area employment); Huntsville, AL (7.7 percent); and Columbus, IN (7.1 percent).

### **Building and grounds cleaning and maintenance occupations**

- Building and grounds cleaning and maintenance occupations had **employment** of 4.5 million and an **annual mean wage** of \$39,540. (See table 1.)
- The **largest** building and grounds cleaning and maintenance occupations were janitors and cleaners, except maids and housekeeping cleaners (2.2 million) and landscaping and groundskeeping workers (943,430). (See table 1.)
- All 10 building and grounds cleaning and maintenance occupations had annual mean wages below the U.S. average of \$67,920. The **highest paying** building and grounds cleaning and maintenance occupations were first-line supervisors of landscaping, lawn service, and groundskeeping workers (\$59,380) and tree trimmers and pruners (\$54,970). (See table 1.)
- The **lowest paying** building and grounds cleaning and maintenance occupations were maids and housekeeping cleaners (\$36,180) and janitors and cleaners, except maids and housekeeping cleaners (\$37,460). (See table 1.)
- About 1.8 million building and grounds cleaning and maintenance jobs were in the services to buildings and dwellings industry, which includes janitorial services and landscaping services. **Industries** with the highest employment of this occupational group also included traveler accommodation (517,600) and elementary and secondary schools (354,970).
- Landscaping and groundskeeping workers, one of the largest building and grounds cleaning and maintenance occupations, had an annual mean wage of \$40,880 nationally. Wages for this occupation varied by state from \$32,310 in West Virginia to \$49,130 in Massachusetts and the District of Columbia.

### **Largest occupations**

- The largest occupation overall was home health and personal care aides, with employment of 4.0 million, followed by retail salespersons and fast food and counter workers (each 3.8 million). (See table 1.)
- Eight of the 10 largest occupations had below-average wages, ranging from \$31,350 for fast food and counter workers to \$45,470 for general office clerks. (See table 1.)
- Of the 10 largest occupations, only registered nurses (\$98,430) and general and operations managers (\$133,120) had above-average wages. (See table 1.)

### **Public sector occupations**

- The public sector made up 14.5 percent of employment and had a different occupational mix from the private sector.

- Several of the **largest** public sector occupations were related to education. These occupations included elementary school teachers, except special education (public sector employment of 1.2 million); teaching assistants, except postsecondary (1.1 million); secondary school teachers, except special and career/technical education (920,980); and middle school teachers, except special and career/technical education (546,970).
- Outside of the educational instruction and library group, the occupations with the highest public sector employment were police and sheriff's patrol officers (660,460); registered nurses (533,460); and janitors and cleaners, except maids and housekeeping cleaners (493,840).

Public/private sector ownership data are available at [www.bls.gov/oes/current/oessrci.htm](http://www.bls.gov/oes/current/oessrci.htm).

### **Introduction of New Metropolitan and Nonmetropolitan Area Definitions**

With the May 2024 OEWS news release, the metropolitan area estimates have been updated to reflect definitions based on the 2020 decennial census and delineated in OMB Bulletin 23-01, available at [www.bls.gov/bls/omb-bulletin-23-01-revised-delineations-of-metropolitan-statistical-areas.pdf](http://www.bls.gov/bls/omb-bulletin-23-01-revised-delineations-of-metropolitan-statistical-areas.pdf). As a result of this update, new metropolitan statistical areas (MSAs) have been added to publication, some existing MSAs have undergone name and/or compositional changes, and other existing areas have been removed from publication. Some nonmetropolitan areas have been added, removed, or modified due to the new MSA delineations. For the six New England states, New England City and Town Areas (NECTAs) have been discontinued, and OEWS now publishes the MSAs and nonmetropolitan areas for these states. A spreadsheet of the new OEWS area definitions is available at [www.bls.gov/oes/area\\_definitions\\_m2024.xlsx](http://www.bls.gov/oes/area_definitions_m2024.xlsx).

### **Suspension of Publication of Colorado Occupational Employment and Wage Statistics**

On November 20, 2024, QCEW suspended publication of industry and substate data for Colorado because of data quality concerns caused by issues with the modernization of the state's unemployment insurance (UI) system. By February 19, 2025, the data quality concerns for Colorado had been sufficiently addressed to resume QCEW publication.

OEWS uses QCEW employment data—which provide comprehensive counts of nonfarm payroll employment—to adjust estimates to represent all employment that is in scope for the OEWS survey. The updated Colorado employment data were not available in time to be used in this OEWS news release. As a result, data in this news release do not include substate data for Colorado and its areas. Therefore, this news release only contains data for about 520 metropolitan and nonmetropolitan areas instead of the full count of approximately 530 areas. The OEWS national data may be marginally impacted by the quality issues in Colorado.

# Technical Note

## Scope of the survey

The Occupational Employment and Wage Statistics (OEWS) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OEWS data available from the Bureau of Labor Statistics (BLS) include cross-industry occupational employment and wage estimates for the nation; states, the District of Columbia, and Guam, Puerto Rico, and the U.S. Virgin Islands; and approximately 530 metropolitan statistical areas (MSAs) and nonmetropolitan areas. BLS also publishes national industry-specific estimates for North American Industry Classification System (NAICS) sector, 3-digit, most 4-digit, and selected 5- and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals.

The OEWS survey is a cooperative effort between BLS and the state workforce agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the SWAs collect most of the data. OEWS estimates are constructed from a sample of about 1.1 million establishments. Each year, two semiannual panels of approximately 186,000 to 189,000 sampled establishments are contacted—one panel in May and the other in November. Responses are obtained by Internet or other electronic means, mail, email, telephone, or personal visit. The May 2024 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2024, November 2023, May 2023, November 2022, May 2022, and November 2021. The unweighted sampled employment of 83.5 million across all six semiannual panels represents approximately 55 percent of total national employment. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 65.7 percent based on establishments and 65.9 percent based on weighted sampled employment.

## The occupational coding system

The May 2024 OEWS estimates contain approximately 830 occupational categories based on the Office of Management and Budget's 2018 Standard Occupational Classification (SOC) system. These occupational categories make up 22 of the 23 SOC major occupational groups. Major group 55, Military Specific Occupations, is not included.

For more information about the SOC system, please see the BLS website at [www.bls.gov/soc/](http://www.bls.gov/soc/).

## The industry coding system

The May 2024 OEWS estimates use the 2022 NAICS. For more information about NAICS, see the BLS website at [www.bls.gov/bls/naics.htm](http://www.bls.gov/bls/naics.htm).

The OEWS survey excludes the majority of the agricultural sector, with the exception of logging (NAICS 113310), support activities for crop production (NAICS 1151), and support activities for animal production (NAICS 1152). Private households (NAICS 814) are also excluded. OEWS federal government data include the U.S. Postal Service and the federal executive branch only. All other industries, including state and local government, are covered by the survey.

## Area definitions

The May 2024 OEWS estimates use the metropolitan area definitions in Office of Management and Budget (OMB) Bulletin 23-01. Nonmetropolitan area definitions are specific to the OEWS program and are set in consultation with the SWAs. For more information, see [www.bls.gov/oes/area\\_definitions\\_m2024.xlsx](http://www.bls.gov/oes/area_definitions_m2024.xlsx).

## Survey sample

The OEWS survey draws its sample from state unemployment insurance (UI) files. Supplemental sources are used for rail transportation (NAICS 4821) and Guam because they do not report to the UI program. The OEWS survey sample is stratified by metropolitan and nonmetropolitan area, industry, and size.

To provide the most occupational coverage, larger employers are more likely to be selected than smaller employers. A census is taken of the executive branch of the federal government, the U.S. Postal Service, and state government.

## Concepts

*Occupational employment* is the estimate of total wage and salary employment in an occupation. The OEWS survey defines employment as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station, regardless of whether that unit prepares their paycheck. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

*Wages* for the OEWS survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements.

The responding establishments are instructed to report hourly rates for part-time workers and to report annual rates for occupations that are typically paid at an annual rate but do not work 2,080 hours per year, such as teachers, pilots, and flight attendants. Other workers, such as some entertainment workers, are paid hourly rates, but generally do not work 40 hours per week, year round. For these workers, only an hourly wage is reported.

OEWS receives wage rate data for the federal government, the U.S. Postal Service, and most state government, local government, and private sector establishments. For the remaining establishments without wage rate data, the OEWS survey data were placed into 12 wage intervals. The intervals are defined both as hourly rates and the corresponding annual rates, where the annual rate for an occupation is calculated by multiplying the hourly wage rate by a typical work year of 2,080 hours.

## **Estimation methodology**

The OEWS survey is designed to produce estimates by combining six panels of data collected over a 3-year period. Each OEWS panel contains approximately 186,000 to 189,000 establishments. The full six-panel sample of 1.1 million establishments allows the production of estimates at detailed levels of geography, industry, and occupation.

The May 2024 estimates were produced by a model-based estimation method using 3 years of OEWS data (MB3). Under MB3, data provided by survey respondents are used to model occupational staffing patterns and wages for all unobserved establishments in the population, including establishments that were not sampled, sampled establishments that did not respond, and respondents that did not meet stability criteria.

A donor pool typically consisting of 10 nearest neighbor responding establishments is used to predict data for each unobserved establishment; if 10 donors are not available, then as few as 5 can be used. Donors are matched to recipients based on detailed industry, geographic area, ownership, size, and survey panel. Within a given donor pool, donors that are more similar to the unobserved establishment are given more weight in determining the modeled data.

Each establishment's population employment is set as the average of its May 2024 and November 2023 employment from the Quarterly Census of Employment and Wages (QCEW), the UI database from which the OEWS sample is drawn. Using adjustment factors derived from the OEWS survey data, wages collected in earlier survey panels are adjusted to the reference date of the estimates and donor wages are adjusted for differences between donor and recipient characteristics such as geographic area and industry.

## **Changes and special procedures in the May 2024 estimates**

With the May 2024 OEWS news release, the metropolitan area estimates have been updated to reflect definitions based on

the 2020 decennial census and delineated in OMB Bulletin 23-01. As a result of this update, new MSAs were added to publication, some existing MSAs had name and/or compositional changes, and other MSAs were removed from publication. Some nonmetropolitan areas were also added, removed, or modified due to the new MSA delineations. For the six New England states, New England City and Town Areas (NECTAs) have been discontinued, and OEWS now publishes the MSAs and nonmetropolitan areas for these states.

On November 20, 2024, QCEW suspended publication of industry and substate data for Colorado because of data quality concerns caused by issues with the modernization of the state's unemployment insurance (UI) system. Because the QCEW microdata are fundamentally a byproduct of state UI systems, QCEW data quality is sensitive to changes in these systems. By February 19, 2025, the data quality concerns for Colorado had been sufficiently addressed to resume QCEW publication.

OEWS uses QCEW employment data—which provide comprehensive counts of nonfarm payroll employment—to adjust estimates to represent all employment that is in scope for the OEWS survey. The updated Colorado employment data were not available in time to be used in this OEWS news release. As a result, data in this news release do not include substate data for Colorado and its areas. Therefore, this news release only contains data for about 520 metropolitan and nonmetropolitan areas instead of the full count of approximately 530 areas. The OEWS national data may be marginally impacted by the quality issues in Colorado.

**Table 1. National employment and wage data from the Occupational Employment and Wage Statistics survey by occupation, May 2024—Continued**

Occupation	Employment	Mean wages		Median hourly wages
		Hourly	Annual <sup>1</sup>	
<b>Transportation and material moving occupations (Continued)</b>				
Refuse and recyclable material collectors.....	139,180	\$24.62	\$51,210	\$23.24

<sup>1</sup> Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

<sup>2</sup> Wages for some occupations that do not generally work year-round, full time, are reported either as hourly wages or annual salaries, depending on how they are typically paid.

<sup>3</sup> Represents a wage equal to or greater than \$115.00 per hour.
